Easy to install on New or Existing Trailers

### The Crossfire Dual™ Tire Pressure Equalization System \*\*\*Save on Fuel\*\*\*

#### Under-inflation

20% under-inflation can cause a minimum 30% loss in tire life expectancy.

#### Over-inflation

20% over-inflation can cause a minimum 10% loss in tire life expectancy.

#### Proper Inflation

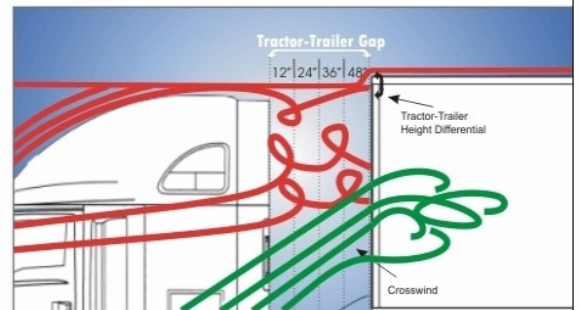

Mounted correctly, Crossfire's yellow indicator verifies that air is flowing freely from one tire to the other, equalizing the load.

With just a glance from as far away as 20 feet, the Crossfire pressure equalization valve indicates an under-inflation problem.

The Crossfire pressure equalizing valve signals an over-inflation problem which can dramatically shorten tire life.

**\$47.95 / per wheel**

We are an authorized dealer for:

• Save Fuel • Better Crosswind Stability

• Increase Road Safety

• increases miles per gallon 13%
